- All our stock is collected from a **Bioregional Provenance** aspect as per and following **FloraBank national guidelines for seed collection**.
- All our stock is from **multiple natural populations of wild trees** as per **FloraBank national guidelines for seed collection** to allow for maximum genetic diversity and unless specified and **not planted nursery stock plants or street trees** and this is reflected in our pricing.
- We grow the **hard to acquire and propagate** species due to our understanding of most Rainforest plants not being available by commercial industry, by growing these we help to promote biodiversity plantings (these plants are noted with a **(H)**).
- All our stock is **seed grown to promote genetic diversity and to prevent genetic inbreeding depressions** unless stated.
- Orders **over 50 plants** for ongoing clients are charged at wholesale prices, all other **members of the public** wholesale prices are for orders **over 100**, which in these cases the new quote will be emailed to you upon placing your order.
- We can **also acquire Stock** on your behalf that is not available atm or grown by BPA (email enquires) (Note: there is no guarantee that stock from other nurseries are wild collected or not cutting grown).
- Plant orders are taken **via email only** to avoid confusion and prevent mishaps.
- Orders regarding plant **numbers available** are determined once received and processed, and first in first served so confirmation of this will be sent via email.
- If a plant is labelled as Not in stock, clients are able to request for the plant however this will be dependent on the growing season, growing time and availability of the plant.
- **Delivery** of plants can arranged during a scheduled appointment, otherwise deliveries are to be picked up by the client once payment has been approved, in which case please email BPA to make arrangements for contactless pickup or for the plants to be shipped via courier.
- **We do not hold stock unless it is paid for in full, this is due to unfortunate circumstances of the past.**
